DataOnline selected in 'Connected World' top 100 companies for 2012

Berkeley Hts., NJ – October 5th, 2011.

DataOnline is pleased to announce that *Connected World* magazine has released their M2M 100 list for 2012 and that DataOnline has again made the list.

The CW 100 represents the top companies demonstrating market traction and pursuing game-changing technologies in connectivity.

The list provides a guide to the companies making a difference in connected devices and M2M, as chosen by the editors of *Connected World* magazine. From those that have long established their expertise to organizations just emerging in the market, the CW 100 is made up of innovative companies that are leading the charge when it comes to M2M.

“Each year as M2M gains in popularity, industry stalwarts work to entrench themselves into the connected devices industry and CW 100,” says Peggy Smedley, editorial director, *Connected World*. “As the market continues to grow, the fight to find a position on the CW 100 becomes increasingly more challenging, yet desirable.”

Companies appearing on the CW 100 are chosen from a selection of hundreds of firms, both private and publicly traded. The criteria for the listing include: sales and earnings growth, contribution to the connected-devices space, and innovation in multiple markets served during the past 12 months.

The companies listed on the CW 100 for 2012 are as follows:

Aeris Communications Inc.
Aeroscout
Alcatel-Lucent
