DataOnline exhibiting with M2M Zone partners at CTIA 2009, San Diego– Oct 7th -9th

Berkeley Heights, NJ – October 5th, 2009.

DataOnline announced today that it will be exhibiting with several of its M2M partners, within the M2M Zone Pavilion at the CTIA Wireless show in San Diego, CA, from October 7th thru October 9th.

Anna Clark, DataOnline's director for Sales & Marketing in the Americas commented "We are excited to be in San Diego this year with many of our wireless partners. Please come visit us and learn more about both DataOnline and our partners at the show. DataOnline's products and services will be exhibited at booth #447 - Orbcomm, booth #550 – RACO Industries, booth #646 - Numerex and booth #542 – T-Mobile."

The M2M Zone is one of the CTIA show's technology Pavilions where network operators, application designers, hardware manufacturers and end users come together to deploy exciting wireless M2M communications technology. With huge investments in energy infrastructure, transportation efficiency, and healthcare in the US – thanks in no small part to government-led stimulus spending – ABI Research expects the M2M market in North America to grow 32% annually over the next 5 years. Embedded communication technology that can communicate location, status, and other characteristics are already growing dramatically as businesses realize the effect that device connectivity can have on their bottom lines. Machine-to-Machine solutions include wireless remote control and monitoring of fixed and mobile devices for enterprise and consumer markets, in addition to sensors and RFID technologies.

About DataOnline

DataOnline® is a leading global provider of M2M (Machine To Machine) solutions specifically for the monitoring of remote industrial assets. DataOnline was selected again as top M2M company in 2009 by M2M Magazine (www.m2mmag.com) DataOnline specializes in robust and reliable hardware, data acquisition, wireless communications and advanced Web based information management services.
