DataOnline launches CMDA products.

Berkeley Heights, NJ – July 19th, 2006 - DataOnline LLC has signed an agreement to utilize the largest CDMA Network in the U.S. for its range of DataPort™ remote asset monitoring products.

“The addition of CDMA data communications provides a key alternative snap-in module to complement our existing solutions using GSM, 2-way paging, satellite, IP and phone line based networks. The DataPort™ is the most versatile remote monitoring device on the market and underlines our motto of ‘any data anywhere’ commented Martin Adams, DataOnline COO.

About DataOnline

DataOnline is a leading global provider of M2M (Machine To Machine) solutions specifically for the monitoring of remote industrial assets. DataOnline specializes in robust and reliable hardware, data acquisition, wireless communications and advanced Web based information management services. Our total end-to-end solutions are quick, easy and cost effective putting you in control with the power to continuously monitor, assess and manage your remote assets via the Internet. From logistics to maintenance and environmental compliance to sales, DataOnline has the right monitoring solution for your business application.

DataOnline has offices in the US and Europe.
